NOTE IX.

RECTIFICATION OF TWO GENERIC NAMES

BY

Dr. J. BÜTTIKOFER.

I am sorry to say that amongst the new generic names, occurring in my recent paper on the genus *Pycnonotus* and some allied Genera (N. L. M. XVII), *Centrolophus* and *Gymnocrotaphus* are already preoccupied among the Fishes, the first being used by Lacépède, the second by Günther. I propose, therefore, to substitute the name *Centrolophus* (pp. 226 and 230) by *Bostrycholophus* (curl-crest) on account of the upward-bent longer crest-feathers, and the name *Gymnocrotaphus* (pp. 227 and 245) by *Bonapartia*, Bonaparte being the author of the single species of this peculiar genus.
